Address

Dear:

As Congress works on the fiscal year 2020 budget and spending bills, I ask you support legislation, which would continue the progress made to reduce global malnutrition.

Malnutrition is responsible for nearly half of the worldwide childhood deaths; and those children who survive, who are malnourished are at great risk for irreversible physical and cognitive development, which puts them at risk of not attaining their full potential of being productive individuals.

Real progress has been made, but we have a long way to go. Increased access to nutritious foods; encouraging and supporting mothers to breastfeed; ensuring safe drinking water and sanitation will allow these children the possibility to develop to their fullest potential.

All members of our various faith communities need to respond compassionately to women and their children around the world, and so I urge you show your commitment and invest in programs, which improve global nutrition

Thanks you for considering my request.

Sincerely yours,
